I love my Mr.Stacky. Being elderly it took me a while to get it up and running on my balcony. It's running smoothly and I have tomato seeds plus others sprouting on two layers. Looking forward to when I can safely take a trip to the nursery for seedlings. I can hear the sound of the water trickling from inside and it's lovely.

I've got baby spinach in the bottom pots and snow-peas in the top one, to cascade down. They are all growing well so far. The terracotta color is a lot brighter than I thought it would be, so I have painted the pots green, and they look great!

Been so happy with our 3 tower system, that we are about to purchase a 9 tower system! It's early in spring in Melbourne at the moment, so plants are still small, but they are growing so fast with the recent sunshine. We have strawberries on top and then carrots, kale, lettuce, coriander and parsley all grown from seed. We found the system pretty easy to set up with the instructions...
